

The BOX Seat was specified by FIFA for use at the World Cup in South Africa.

2010 FIFA WORLD CUP

The BOX Seat 903 model was installed for the 2010 FIFA World Cup, which took place at the Cape Town Stadium, purpose-built for the global occasion.

The BOX Seat increased the fixed seating capacity for the duration of the tournament and was the only seating model specified by FIFA as a semi-permanent solution for World Cup events.
