

The BOX Seat has been specifically designed to compliment multipurpose stadium environments.

FRIENDS ARENA

As Sweden's National Stadium, the magnificent Friends Arena utilises The BOX Seat 903 model to furnish what has become the largest retractable outdoor seating system in Europe. The main tenants of the stadium are Sweden's national football team and top-tier football club, AIK, but the ground is phenomenally

multipurpose, enabled by a unique exterior retractable seating system. The compact BOX Seat design was the perfect choice for both a folding retractable seating solution and fixed tier seating areas, allowing for a 'one-seat' solution throughout.
