

The BOX Seat retractable seating provides compact comfortable seating whilst maintaining the versatility of the space.

TOWNSVILLE RSL STADIUM

The BOX Seat 903 retractable model provides seating for spectators at the Townsville International Sports Centre, comprising three multi-sport courts.

The centre has 3 courts in use, but for feature games, retractable seating can extend across both side courts to provide additional viewing.

To secure investment from government bodies for the project, planners were to create a broadly versatile facility incorporating economical designs, construction and materials. The BOX Seat retractable system is exemplary of this; providing compact comfortable seating whilst maintaining the versatility of the space.
