

*achieving the ultimate true radius curve seat install  
complimented with a hidden rail and fixing technique*

**BEHER SHEVA**

**THE BOX SEAT®**

[www.theboxseat.co](http://www.theboxseat.co)

The Box Seat 901 model was installed on a custom-engineered, hidden riser mount system at the new Beher Sheva Arena.

The cleverly executed true radius seat rail curvature was formed to match the architect's vision, created by the true radius concrete form.

The BOX Seat 901 compliments the usability of the venue by offering the widest walkway achieved through the patented compact seat.

The combination of true radius corner curvature and compact 901 seat offers the ultimate in spectator sight lines.
