

THEBOXSEAT®

905 model

ENVIRONMENTAL SUSTAINABILITY

The BOX Seat's unique geometry and compact rotation system supports reduced raw material usage. The design structure promotes deconstruction and component replaceability. All materials are recyclable promoting conservation and environmental awareness. The BOX Seat is subject to multiple International Patent & Design Registrations.

The BOX Seat 905 model is engineered with an integrated soft cushion or rigid insert option in either a high backrest or standard backrest configuration.

These features mean the 905 model can meet a suite of venue parameters such as high riser installations where

normally hand rails are required, and tight retractable platforms where compact standard backrest is required.

Additionally the interchangeable soft and rigid inserts offer a range of comfort options.

Cushioned or rigid insert system offers either a hard or soft seating option.

High or standard backrest format supports high riser installations removing the need for hand rails.

Perfect seat combination for the Gridlock flat floor rail system.

Compact seat design engineering integrates into retractable or telescopic seating platforms.

The BOX Seat 905 model comes with:

- Choice of upholstered or rigid inserts.
- Exclusive maintenance-free quality upholstery.
- Components moulded using recognised quality polymers.
- All materials are quality rated as required.
- Compact seat width for high volume installation.
- Strength and Durability tested.
- TBS rail available in Galvanised or Powdercoated finish.
- Riser mount & Tread mount options.
- Soft action 'tip-up' mechanism.
- Armrest & Cupholder Accessories.
